Resources for Animal & Pet Services in Arizona

Animals can make our lives better in many ways. A strong human-animal relationship helps to reduce isolation, maintain good health, and cope with stress.

The links below are to services found in the 2-1-1 Arizona database. Select a link and add a location under Custom Search at the top.

Animals can provide assistance. The Americans with Disabilities Act (ADA) defines a service animal as an animal trained to provide assistance to a person with a disability, such as a seeing eye dog.

- Service Animals

Animals can provide healing. Animal assisted therapy involves animals as a form of treatment. The programs are designed to improve people’s social and emotional functioning.

- Animal Assisted Therapy

Animals can also be fun. Pets can be good company and a great source of entertainment.

- Animal Adoption
- Zoos

ANIMAL CARE RESOURCES:

- Pet Care Information
- Pet Training
- Animal Lost and Found

ANIMAL HEALTH RESOURCES:

- Low Cost Neuter/Spay Services
  - It’s cheaper to fix/sterilize your pet than it is to care for a litter of puppies or kittens.
• Your pet may live a longer, healthier life and be better behaved if they are spayed or neutered.
• It’s kinder. The ASPCA estimates that every year 1.5 million dogs and cats are put to sleep in this country due to overpopulation.

• Animal Poison Information
• First Aid for Pets Training

GRIEF RESOURCES:

• Pet Loss Support Groups

RESOURCES FOR PET OWNERS IN NEED:

• Free Pet Food
• Veterinary Care Expense Assistance

RESOURCES TO HELP OUR ANIMAL FRIENDS:

• Animal Food/Supplies Donation Programs
• Animal Services Volunteer Opportunities

PETS IN THE ARIZONA SUMMER SUN:

▪ Never leave your pets alone in the car. It’s:
  ▪ Illegal - In Arizona, it’s a class 1 misdemeanor according to ARS 13-2910, subsection A, paragraph 7.
  ▪ Dangerous - The American Veterinary Medical Association estimates that when it’s 85° outside, in just ten minutes it can get to 104° in the car. When it’s 95°, it can get to 114° in that same time. Because cats and dogs do not sweat the way people do, that puts your pet at risk of serious illness and even death.

▪ At home and about:
  ▪ Make sure there is plenty of clean, fresh water.
  ▪ Give them shade.
  ▪ Don’t walk or stand with your dog on hot asphalt. If it’s too hot for your hand, it’s too hot for their paws.

▪ Look for snakes. They are most active from March through October, but can be out at any time.
  ▪ The best treatment is prevention. Watch where you walk and where you lead your dog to walk. Stay away from brush which could be hiding snakes or other desert creatures.
  ▪ If you are bitten, get to a hospital.
  ▪ If your pet is bitten, get them to the veterinarian.
RESOURCES FOR DIFFICULT ANIMALS:

- Snake & Wildlife Rescue/Relocation
- Animal Control
- Feral Cat Management Programs
